

Name : Shivam Gour
Contact:6260955860
Email:shivamgour678@gmail.com

Profile Summary

Python AI/ML Developer with hands-on experience in ML models, RAG systems, and API deployment. Skilled in data preprocessing, model evaluation, and vector search.

EDUCATION

B.Tech (Information Technology) – Malwa Institute of Science and Technology | CGPA: 7.0

Technical Skills

Programming & Data: Python, NumPy, Pandas, Matplotlib

Machine Learning: Regression, Classification, Clustering, Model Evaluation

GenAI & NLP: RAG, Embeddings, Semantic Search, AI Chatbots, Document QA, Langchain , LLM

Algorithms: Linear & Logistic Regression, KNN, SVM, Decision Tree, Random Forest, K-Means, PCA, DBSCAN

Tools: Gemini API, FAISS, Streamlit, GitHub, VS Code

Deep Learning: TensorFlow, PyTorch

Backend & APIs: FastAPI, Flask

Projects

RAG-Based Document Question Answering System (Gemini + FAISS):

- Built end-to-end Retrieval-Augmented Generation (RAG) pipeline for PDF-based QA.
- Implemented semantic chunking and vector indexing using Gemini embeddings and FAISS.
- Applied cosine similarity search with threshold filtering to reduce hallucinations.
- Developed extractive QA layer for concise, document-grounded responses.

Tech: Gemini , API , Faiss , python

AI Resume Screening System:

- Built an NLP-based resume matching system.
- Extracted PDF text & applied keyword scoring.
- Automated candidate shortlisting process.

Tech: Python , NLP

Customer Segmentation:

- Applied K-Means clustering for customer grouping.
- Used PCA for dimensionality reduction.
- Identified key segments for targeted strategy.

Tech: Python, Scikit-learn

EXPERIENCE

ML Intern – Cognifyz Technologies (1 Month): Built ML models.

ML Trainee – The Prime Step (6 Months): Training in regression & classification.

GENAI EXPERTISE

RAG Pipeline | Embeddings | Vector Search (FAISS) | Similarity Search | Prompt Engineering
